

# Project Summary

## Wyong Hospital Redevelopment

New South Wales

The Wyong Hospital Redevelopment will significantly increase health capacity on the Central Coast and meet the growing healthcare needs of the community.

The redevelopment delivers a new hospital building, which will house a new and expanded Emergency Department and Intensive Care Unit. It will also involve the refurbishment of parts of the existing hospital, including an additional operating theatre and three new recovery bays.

The project will improve the patient experience by providing residents access to more health services closer to home, which will enable them to remain near family, friends and existing support networks.

The NSW Government is investing \$200 million to redevelop Wyong Hospital, plus a further \$6.4 million to expand the Wyong Cancer Day Unit.
