

Project summary

Frankston Private Hospital - Stage 1

Victoria

Frankston Private Hospital Stage 1 was a major expansion. The centrepiece of these works was the construction of a new building opposite the existing hospital that has created a new main entry as well as an additional 60 inpatient beds, three operating theatres, and a day oncology unit. Refurbishment works were also completed on the existing hospital including converting the day oncology unit into a second staged recovery unit and expanding the central sterile services department.
