

SIGMAMAX MODULAR SERVICES WALL - SURFACE

SIGMAMAX

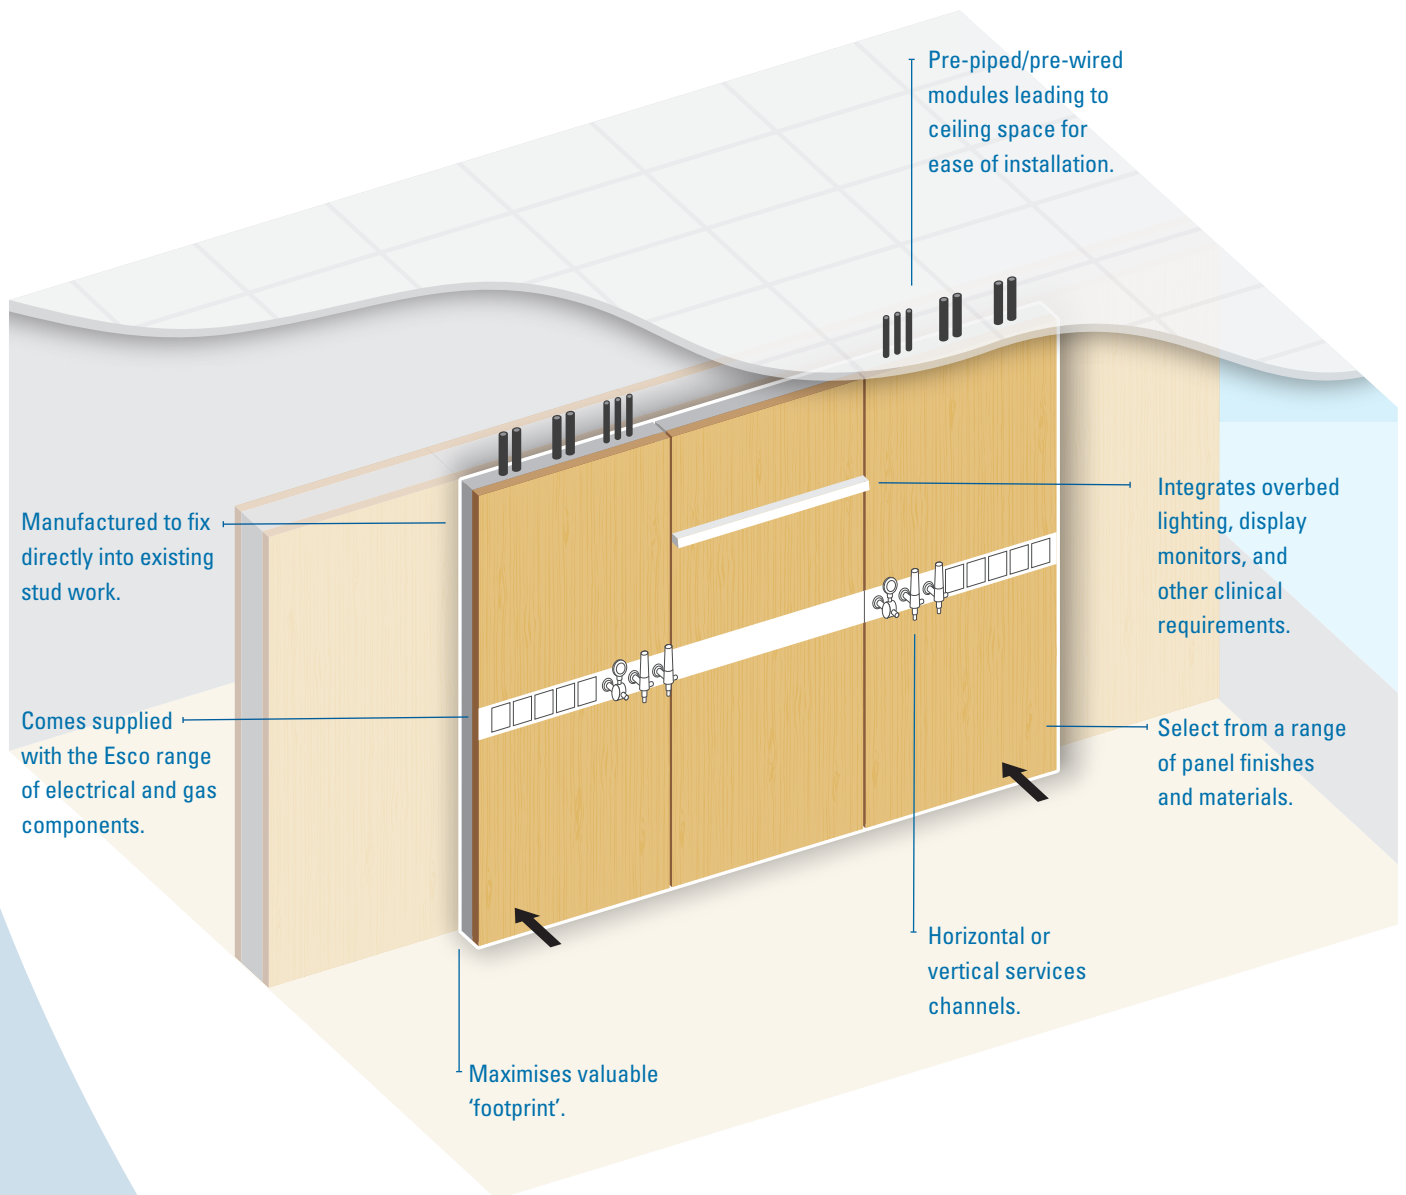

SigmaMax Modular Services Wall - Surface

The SigmaMax Modular Services Wall (MSW) combines industry leading medical solutions with limitless flexibility and functionality.

Providing a completely modular and configurable solution, the SigmaMax system enables us to work in collaboration with our customers, to help them achieve the 'look, feel and functionality' they require while maximising the gained efficiencies this product delivers.

Prefabricated and independently tested to relevant standards in our own factory ensures premium quality is achieved and allows for unprecedented site efficiencies.

Maintaining Esco's 60 year factory manufactured quality the SigmaMax Modular Service Wall is supplied pre-wired and pre-piped for ease of installation. Key features and benefits include:

- Recessed and Surface Mounted options.
- Completely modular and configurable.
- Manufactured to work with existing stud work.
- Acoustic and fire rated materials can be added to chassis to meet requirements.
- Pre-piped and pre-wired complete with Esco ESPEED modules leading to ceiling space for ease of installation.
- Complete with the Esco range of electrical and gas components.
- Services channels horizontally or vertically – fully customisable.
- Integrates services like overbed lighting, display monitors, and other clinical requirements.
- Maximises valuable 'footprint'.
- Utilises a hook and latch system resulting in an aesthetically pleasing screwless finish.
- Variety of panel finishes and materials.
- Independently tested and certified.
- Compliant to all relevant Australian and New Zealand standards.
- Not limited to bed head walls, the solution is adaptable and can be configured to suit any application requiring service reticulation.

Why ESCO

ESCO Medicon is Australia's leading manufacturer of medical electrical and medical gas equipment, including medical services pendants, medical services panels, gas terminal outlets, isolating valve boxes, electrical protection devices, lighting and medical plastics.

As a project based division, we specialise in turn-key systems with the combination of supply of in house produced equipment plus third party supplied items, to enable a full contract outcome.
