

Project Summary

Griffith Base Hospital

New South Wales

The Griffith Base Hospital is undergoing a \$250 million redevelopment to bring new and advanced health facilities to the community and surrounding areas. The hospital will have a purpose-built three-story Clinical Services Building that will house all major health services under one roof. This new building will support the latest models of care, ensuring patients receive the best possible treatment. In addition, the redevelopment includes the construction of a Non-Clinical Services Building, demolition of old hospital buildings, and new landscaping and car parking facilities. The redevelopment project is set to be completed by 2025.

Supplied by **esco**
industries

- Line Isolation & Overload Monitors
- Medical Gas Outlets
- Medical Gas Isolation Control Valve Boxes
