

Project Summary

NZ Blood Service - Highbrook Fitout Stage 1

New Zealand

Image: <https://acmf.co.nz/gallery/commercial,louvres-and-screens/nz-blood-highbrook/>

The New Zealand Blood and Organ Service has committed to a tailored property solution at the Highbrook Business Park in East Tāmaki. They have secured one of the last remaining development sites at the \$1.9 billion estate. The Crown entity has specified that the new office and warehouse facility, covering 3290 sqm, be designed and constructed to a standard that exceeds the current building code. The additional requirements include greater structural strength and improved seismic performance to ensure that the medical support service can continue to operate in the event of a natural disaster. The specialised storage and distribution facility will also have a blood donor clinic. Modempak worked alongside a major local electrical wholesaler branch to offer powder-coated cat6 ducting for this prestigious project in Highbrook.
