

Project Summary

The George Centre

New South Wales

Image: <https://thegeorgecentre.com.au/private-health-facility/>

The George Centre is set to complement Sydney's exemplary public health system in the Southwest and provide vital support to meet local healthcare needs. Currently, many people have to leave the region to access healthcare services. The maternity, paediatric, and surgical hospital will also help to attract and retain local medical talent in NSW's fastest-growing region.

The five-story building will house state-of-the-art operating theatres, specialist maternity delivery suites, radiology, pathology, endoscopy, and other allied health services. In addition, the centre will provide support services such as a pharmacy and a multilevel car park.

Supplied by **esco**
industries

- Alphamax Recessed Services Panels
- Medical Gas Isolation Control Valve Boxes
- MediTek Switchgear & Accessories
- Medical Gas Outlets
